End-to-End Skeleton Flow

Last updated: May 2026

Client action

Company / staff

Waiting / pending

Bot / automation

AI layer

01 · PUBLIC ACQUISITION — NEW COMPANY GETS STARTED

NEXT: WHITE LABEL SETUP

02 · WHITE LABEL — COMPANY CUSTOMIZES THEIR BRAND

NEXT: CLIENT ONBOARDING

03 · CLIENT ONBOARDING — COMPANY BRINGS IN THEIR FIRST CLIENT

COMPANY

1

Adds client from dashboard

Enters first name, last name, email, phone. Selects mailing preference (Regular or Certified).

SYSTEM

2

Onboarding link generated + sent

Unique secure link created. Company copies and sends to client via email, SMS, or any app. Link expires in 30 days.

☐ AUTOMATED

PENDING

3

Awaiting client to complete form

Client has 30 days. Status stays "Pending." Bot sends reminders at 12-hour intervals if form is incomplete. Client can reply "tomorrow at 2pm" — bot schedules follow-up for that exact time.

CLIENT

4

Opens onboarding link — sees branded portal

Branded form opens. No login needed. Company logo shown top-left. Legal consent checkbox required before proceeding.

CLIENT

5

Watches welcome video

Portal welcome video auto-plays (muted, looping). Explains what to expect, how disputes work, and what comes next.

CLIENT

6

Completes onboarding wizard

Personal info → identity theft disclosure (conditional) → credit disputes → preferences → consent → submit.

BOT

7

Portal access opens — status advances

Form data saved. Client lands in their portal. Status moves to "Docs Pending." Client can now chat with AI support 24/7.

☐ AUTOMATED

BOT

!

Smart follow-up for quiet clients

12-hour reminder cron fires. If client replies with a specific time, bot schedules exactly that time and stops generic reminders.

☐ AUTOMATED

NEXT: DISPUTE ENGINE — FULLY AUTOMATED

04 · DISPUTE ENGINE — AI PARSES CREDIT REPORT AND PREPARES DISPUTES AUTOMATICALLY

Fully automated. No staff review step. Bot parses credit report → identifies negative items → generates dispute letters → queues for mailing. Staff only handles the physical mail drop.

CLIENT

1

Uploads credit report PDF

Client uploads credit report from Credit Hero member portal. PDF goes to document storage.

AI

2

Credit Hero PDF parsed

System extracts all tradelines, bureau assignments, account statuses, and dispute history from the PDF.

AI PARSED

BOT

3

Negative items identified

Bot maps tradelines against client's onboarding disclosures. Flags inaccurate, outdated, and unverifiable items.

AUTOMATED

BOT

4

Dispute letters generated

Formal dispute letters drafted for each bureau. All letters queued in Mail Queue under the client's record.

AUTOMATED

QUEUE

5

Letters sit in Mail Queue

Queued tab shows all pending letters. Staff reviews which clients/letters to mail. Tracking number required for Certified.

STAFF

6

Marks as mailed

Staff physically mails letters. Enters tracking number, clicks "Mark as mailed." Token deducted from company account.

STAFF ACTION

BOT

7

Client notified of shipment

Bot messages client in portal: "Your dispute letters have been mailed. Here's your tracking info." Certified mail = company charged.

AUTOMATED

BOT

8

Tracks bureau response window

Bot monitors for bureau response. Escalates to company if letters stuck beyond SLA thresholds (24h / 48h / 72h / 7 days).

AUTOMATED

CLIENT

9

Uploads updated credit report

Bot messages client: "Time to pull a new credit report — upload it here." Dispute cycle repeats if needed.

AI

10

New report parsed — delta analyzed

Bot compares new report vs. previous. Identifies deletions, improvements, new negatives.

AI PARSED

BOT

11

Result sent to client — funding alert fires

Bot notifies client of bureau response. If score improved, funding opportunity alert fires automatically.

AUTOMATED

NEXT: CLIENT SUPPORT — AI HANDLES EVERYTHING

05 · CLIENT SUPPORT — AI HANDLES ALL QUESTIONS AUTOMATICALLY

CLIENT

1

Clicks "Message support" in portal

Client clicks the chat button in their portal. Chat widget opens directly — no page navigation, no email required.

AI

2

AI reads full client context before answering

Client name · lifecycle stage · onboarding status · dispute counts · deletion counts · provider name · funding interest.

FULL CONTEXT

AI

3

Answers credit repair questions

Dispute status · process questions · timeline questions · scoring questions — all answered from knowledge base + client data.

KNOWLEDGE BASE

BOT

4

Escalates to staff if out of scope

Off-topic, billing, complaints → flagged as STAFF. Staff receives notification. Client sees "our team will follow up."

ESCALATION

AI

5

3-layer fallback on unknown questions

KB search → DuckDuckGo web search → if both fail, escalate to staff with "sending to team" message.

3-LAYER FALLBACK

AI

6

Client rates each exchange

Star rating (1–5) on first AI reply. Rating stored per conversation exchange. Tracked in Bot Quality dashboard.

RATED

STAFF

7

Handles escalations from dashboard

Staff sees escalated conversations in dashboard. Responds directly. Rating from AI layer preserved.

STAFF ACTION

AI

8

KB gaps → new entries added

Escalation patterns reveal KB gaps. Company uses KB Management UI to add Q&As. Bot improves continuously.

CONTINUOUS LEARNING
